

The report includes bar charts, each showing the average of a specific fundamental metric across industries within a sector and market cap category.

- **Initial setup:**

- Copy the folder path of **Undervalued Stock Scanner** project folder
- Open **Industry Averages Report.pbix**
- **Home** tab → Click **Transform data** drop-down → **Edit parameters** → Click on the **FolderPath** parameter → Paste the current folder path to replace the default folder path → Click **OK** → Click **Apply changes** in the popup at the top.

- **To switch to another sector:**

Home tab → Click **Transform data** drop-down → **Edit parameters** → Click on the **FileName** parameter → Choose the Excel workbook corresponding to the desired sector → Click **OK** → Click **Apply changes** in the popup at the top.

Data may not be loaded correctly the first time. Try to refresh data again if there's an error.

- **To choose a market cap category (Large Cap, Mid Cap, Small Cap):**

Use the slicer named "Market Cap" at the top right corner of the report
