The report includes bar charts, each showing the average of a specific fundamental metric across industries within a sector and market cap category.

- **Initial setup:**
  - Copy folder path for Undervalued Stock Scanner project folder in your local machine
  - Open Industry Averages Report.pbix
  - Home tab → Click Transform data to open Power Query → Navigate to Parameters folder in the Queries pane → Click on the FolderPath parameter → Manage Parameter
  - Paste the folder path to the list of FolderPath's values → Choose appropriate Default Value and Current Value → Close Power Query → Click Yes to apply changes
- **To switch to another sector:**
  Home tab → Click Transform data to open Power Query → Navigate to Parameters folder in the Queries pane → Click on the FileName parameter → Choose the Excel workbook corresponding to the desired sector → Close Power Query → Click Yes to apply changes
  Data may not be loaded correctly the first time. Try to refresh data again if there's an error.
- **To choose a market cap category (Large Cap, Mid Cap, Small Cap):**
  Use the slicer named "Market Cap" at the top right corner of the report
